

REMARKS

Applicants and Applicants' representatives wish to thank Examiner Reagan for the assistance extended during the personal interview held on March 10, 2004. In view of the discussion during the interview and the following remarks, reconsideration and allowance of the claims is respectfully requested.

Claims 18-36 are currently pending, with claims 18, 31, and 33 being independent.

An objection was made to the specification for containing embedded hyperlinks. The specification has been amended to remove browser executable code, and thus, Applicants respectfully request removal of the objections to the specification.

Claims 18-35 were rejected under 35 U.S.C. §112, first paragraph, for allegedly failing to comply with the written description requirement. Applicants respectfully traverse this rejection.

As shown in the Table below, the recited claim features are described in the specification, as filed, in such a way as to reasonably convey to one skilled in the art that the inventors had possession of the claimed invention. Specific references are provided below to identify support from within the specification of various recited claim features, although support for the recited claim features also may be found in other places throughout the specification.

Based on the above-noted and other support within the specification for various claimed features, Applicants respectfully request the withdrawal of the §112, first paragraph rejection of claims 18-35 for allegedly failing to meet the written description requirement.

Claims 18-35 were rejected under 35 U.S.C. §112, first paragraph, as allegedly failing to meet the enablement requirement (Office Action paragraphs 9 and 10). Applicants respectfully traverse these rejections.

As indicated in the above table, each of the limitations of claims 18-35 is disclosed in the specification as filed, in at least the referenced portions of the specification, with enough detail to enable one skilled in the art to make and/or use the invention without undue experimentation. Accordingly, Applicants respectfully request reconsideration and withdrawal of the §112, first paragraph rejections of claims 18-35 for allegedly failing to meet the enablement requirement.

Claims 18-35 stand rejected under 35 U.S.C. §103(a) as being unpatentable over U.S. Patent No. 5,710,887 to Chelliah et al. ("Chelliah") in view of U.S. Patent No. 5,970,469 to Scroggie et al. ("Scroggie"). Applicants respectfully traverse this rejection.

As discussed during the in-person interview, Chelliah and Scroggie, either alone or in combination, fail to disclose or suggest one or more of the recited features in the pending claims. Specifically, Chelliah discloses electronic commerce and Scroggie discloses a system and method for providing in-store incentives and/or shopping aids to consumers. However, both references fail to disclose or suggest one or more of the recited features for collecting consumer data (independent claim 18), recording at least part of data transmitted during a secure session of network communication (independent claim 31), and collecting consumer data transmitted during secure sessions of network communication (independent claim 33).

For at least these reasons, Applicants respectfully request reconsideration and withdrawal of the §103(a) rejection of independent claims 18, 31, and 33, and their dependent claims 19-30, 32, and 34-35.
